

Assignment

Write a java program to take boolean data as input and store it in the array. You can consider boolean data as marital status of person.

```
import java.util.Scanner;  
import java.util.Scanner;  
public class Demo {  
    public static void main (String [] args) {  
        Scanner sc = new Scanner (System.in);  
        System.out.println ("Enter People Count");  
        boolean arr[] = new boolean [sc.nextInt()];  
        for (int i=0; i <= arr.length-1; i++) {  
            System.out.println ("Is Person "+ i + " Married?");  
            arr[i] = sc.nextBoolean();  
        }  
        System.out.println ("Array contents are .....");  
        for (int i=0; i <= arr.length-1; i++) {  
            System.out.println ("Person "+ i + " married " + arr[i]);  
        }  
    }  
}
```
