

Write a java program to find the difference of 2 number. The result should always be negative

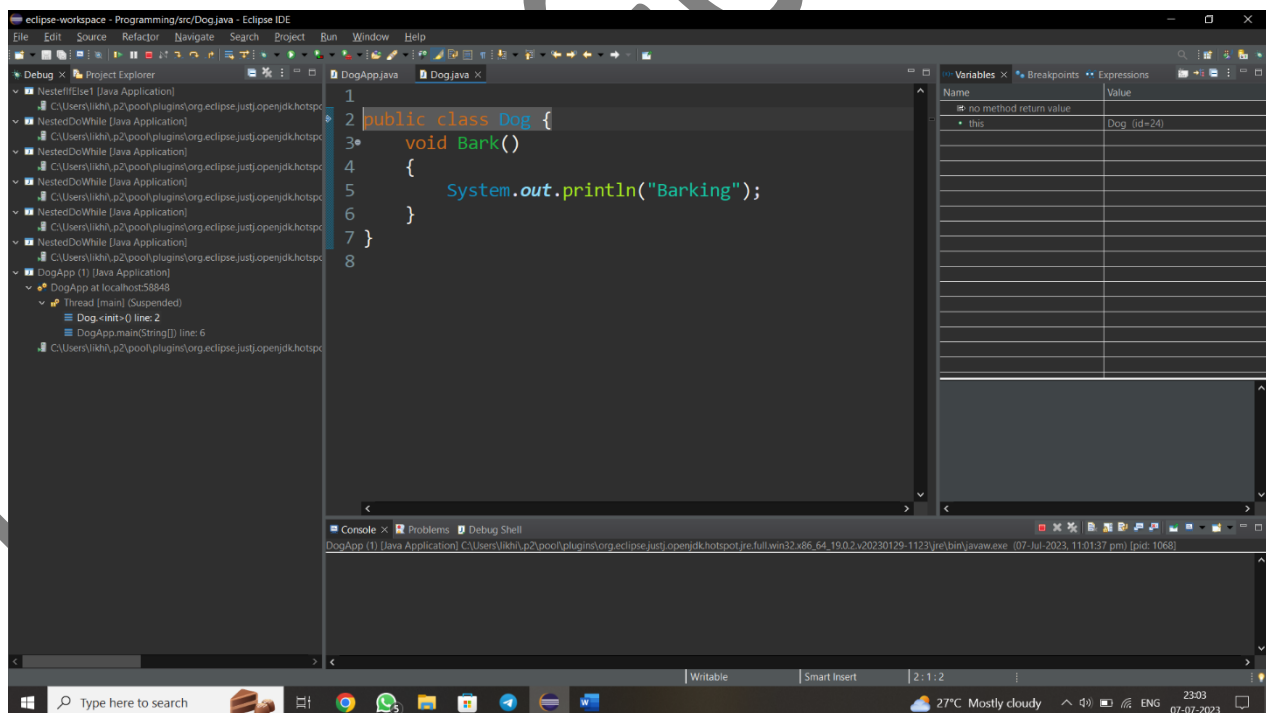

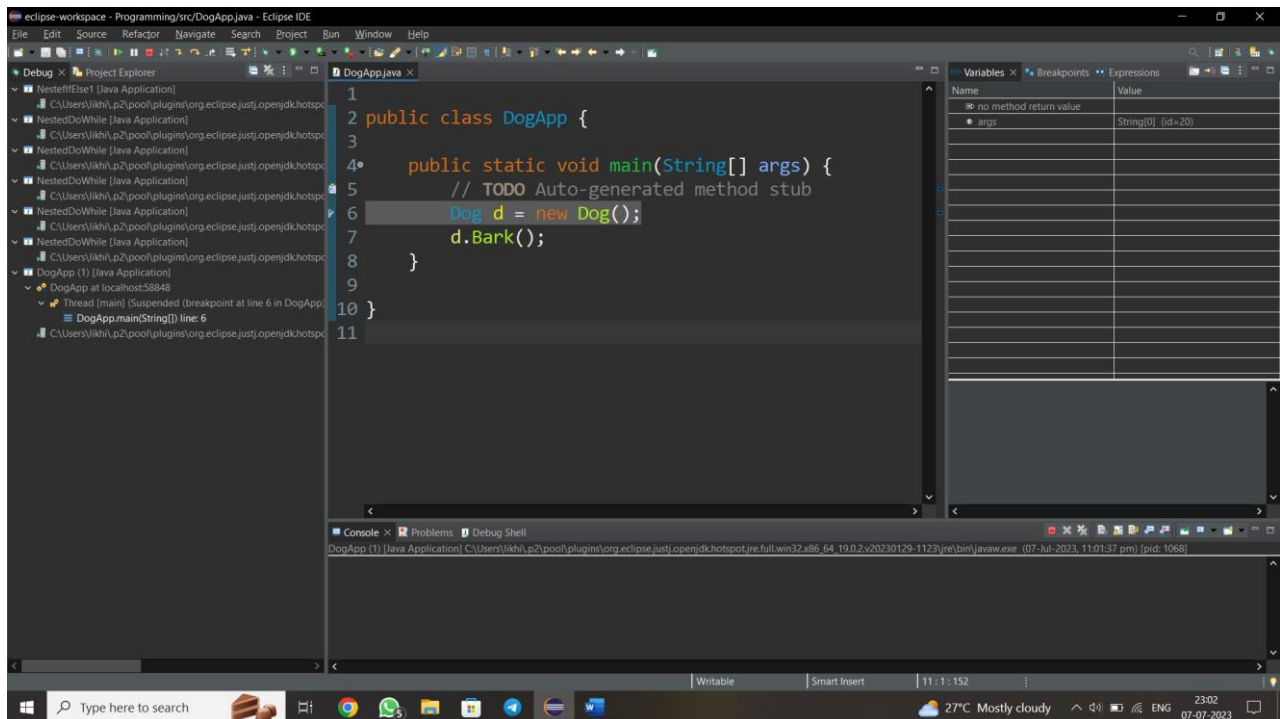

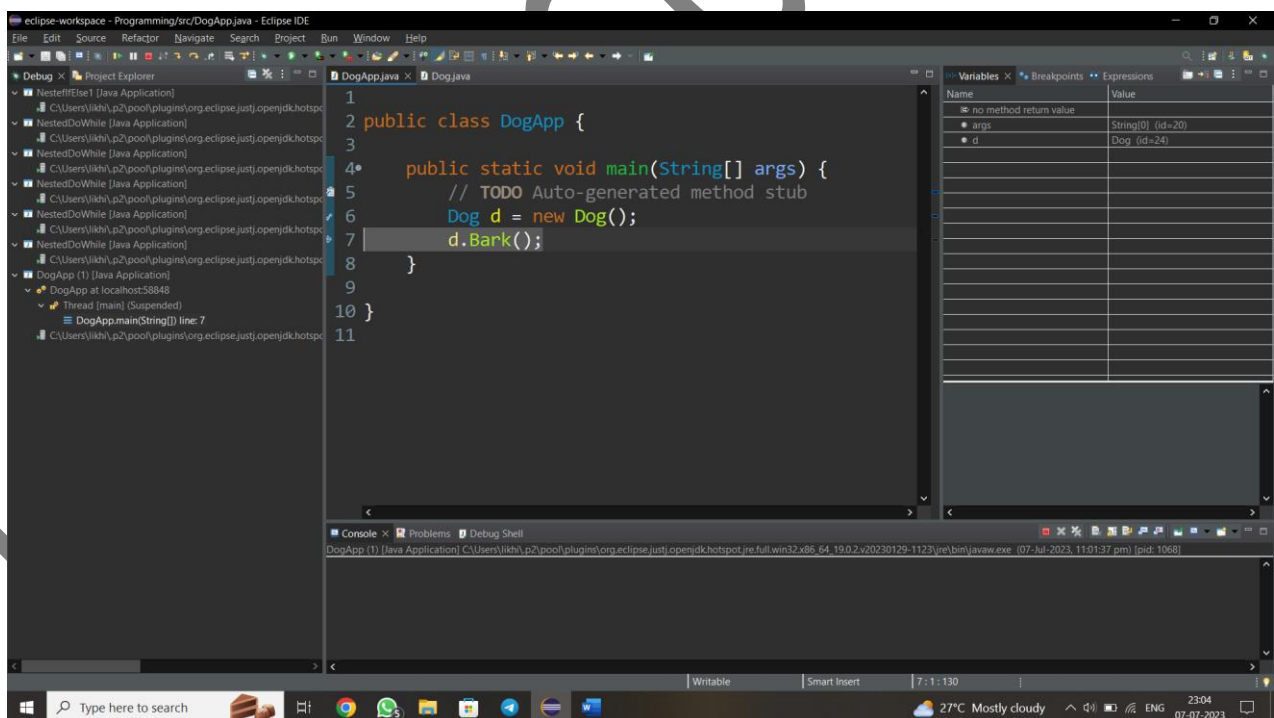

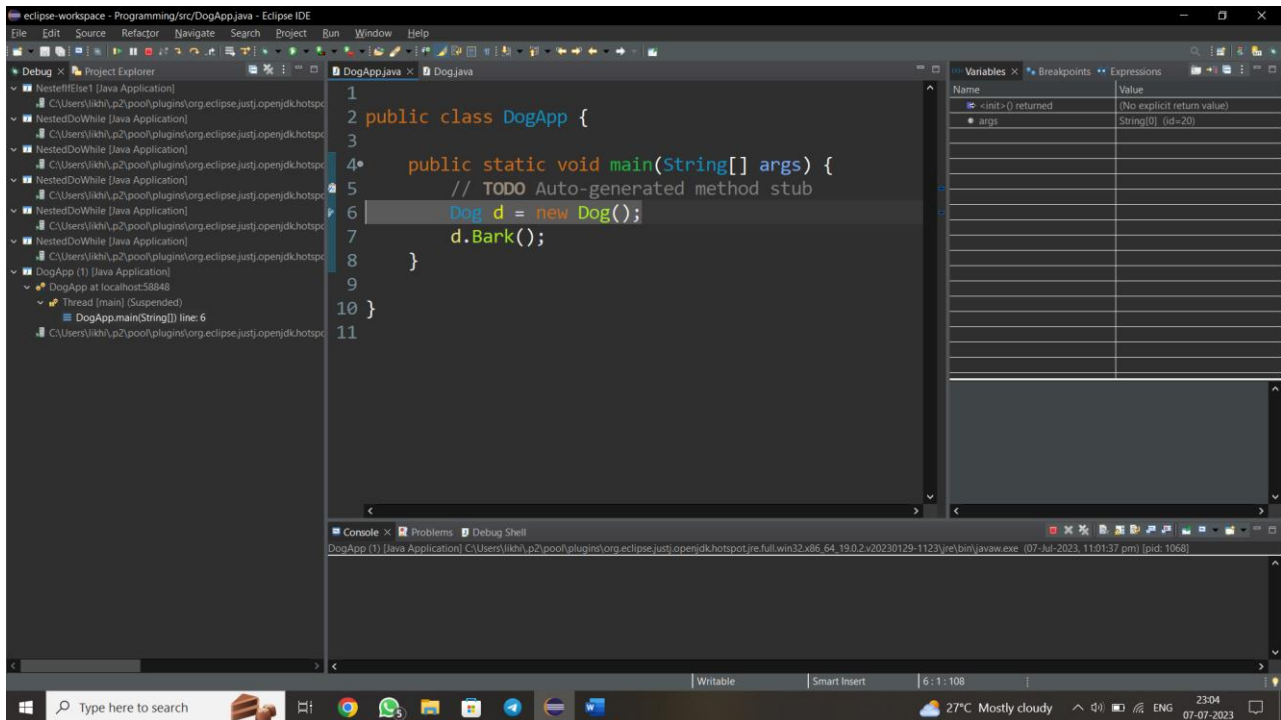

```
1 import java.util.Scanner;
2
3 public class ConditionalConstruct {
4     public static void main(String[] args) {
5         Scanner scan = new Scanner(System.in);
6         System.out.println("Enter two numbers to find the negative difference");
7         int a = scan.nextInt();
8         int b = scan.nextInt();
9         if(a>b)
10            {
11                System.out.println("The negative difference of "+a+" and "+b+" is "+(b-a));
12            }
13         else
14            {
15                System.out.println("The negative difference of "+a+" and "+b+" is "+(a-b));
16            }
17         scan.close();
18     }
19 }
20 }
21
```

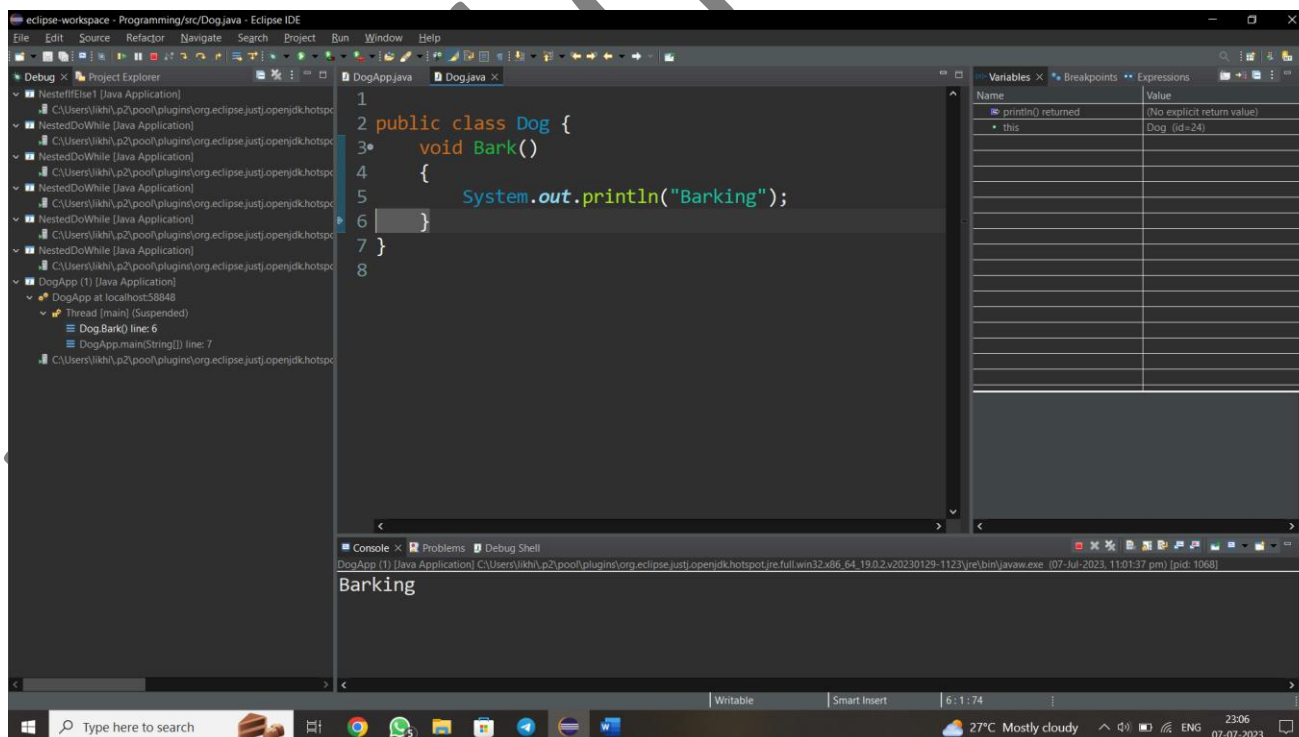

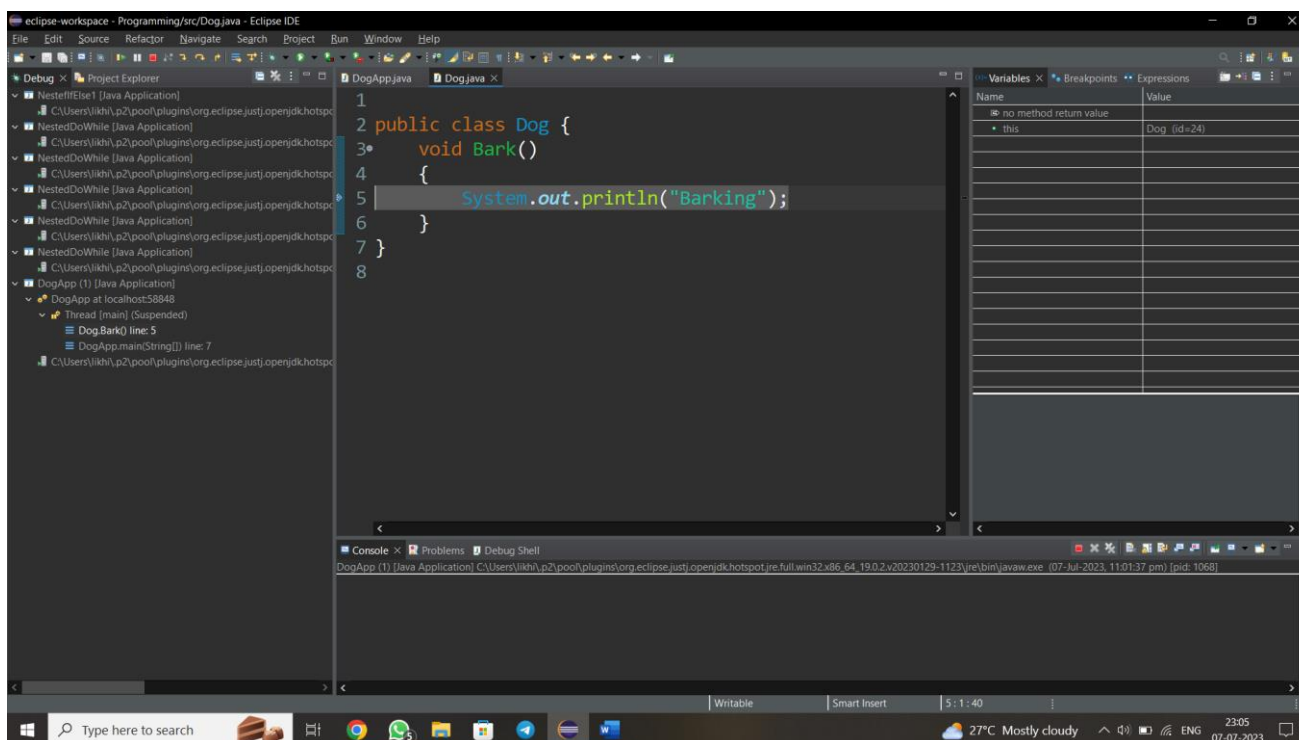

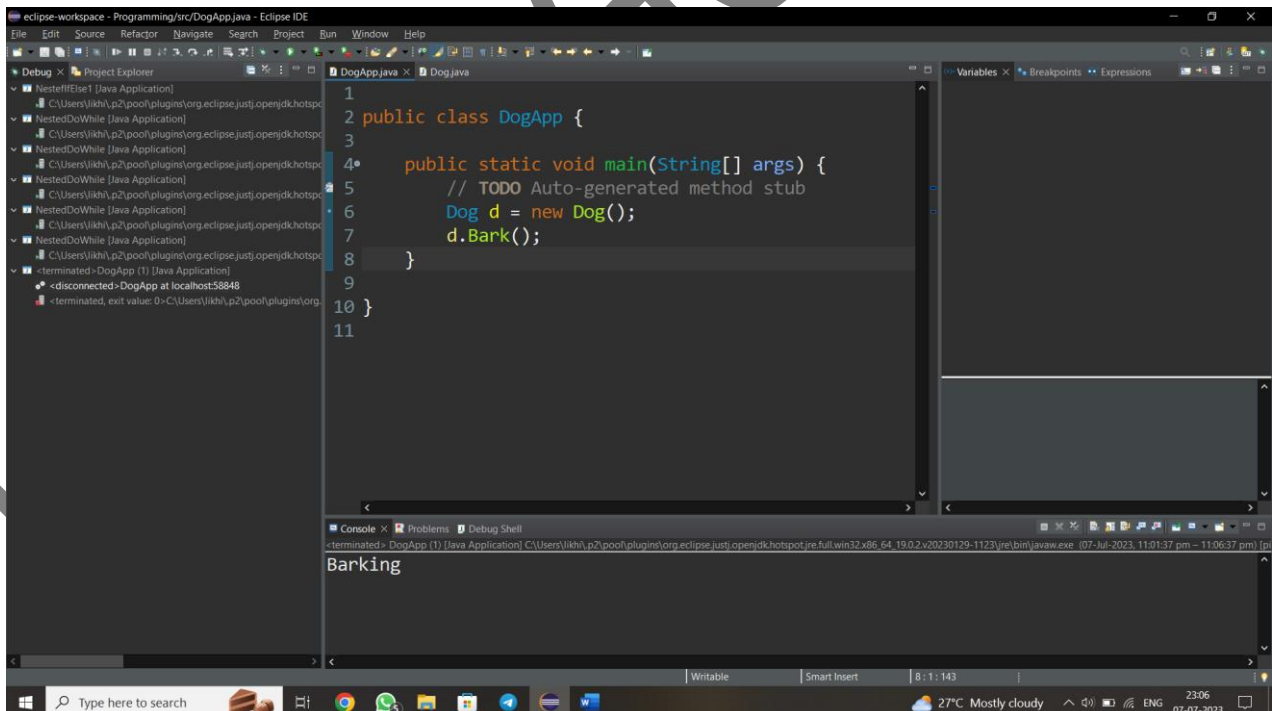

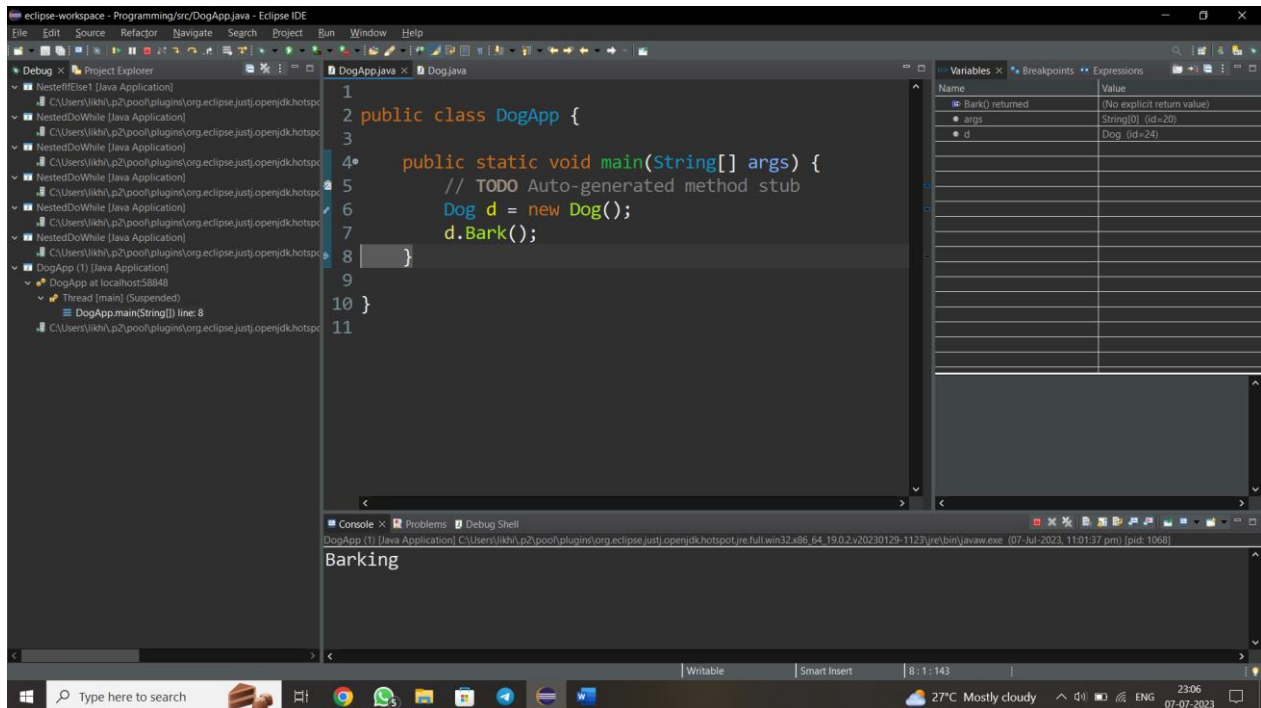

```
<terminated> ConditionalConstruct [Java Application] C:\Users\likhi\p2\pool\plugins\org.eclipse.justi.openjdk.hotspot.jre.full.win32.x86_64.19.0.2.v20230129-1123\jre\bin\javaw.exe (07-Jul-2023, 10:58:34 pm - 10:58:39 pm) [pid: 15240]
Enter two numbers to find the negative difference
10
6
The negative difference of 10 and 6 is -4
```

Debugging the execution flow of calling a method present in object

In order to see the execution path of object method we need to press step into button. Then the execution goes to the class file where the method is present
